

THE CAMBOROUGH

LOWER TOTAL COST PER PIGLET

Prolificacy with:

- Uniform vigorous piglets
- Excellent mothering abilities

Efficiency with:

- Fewer gilt development days
- Lower cost per weaned piglet from
 - Less feed usage
 - More lifetime pigs marketed per gilt
- Weaned pigs with
 - Superior feed conversion
 - High daily gain

Robustness with:

- Low sow mortality
- Long productive life

COUNT POUNDS AND PIGS: INDUSTRY-LEADING PERFORMANCE

The Camborough is bred to maximize the pounds of weaned pigs per year with excellent feed efficiency. In addition, the Camborough can be bred typically three weeks earlier than other genetics, resulting in a higher total number of piglets per sow per lifetime and lower production costs.

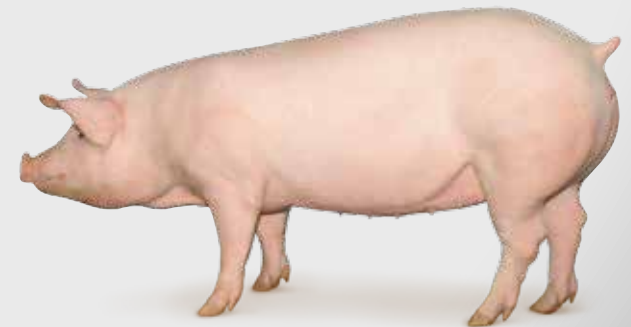

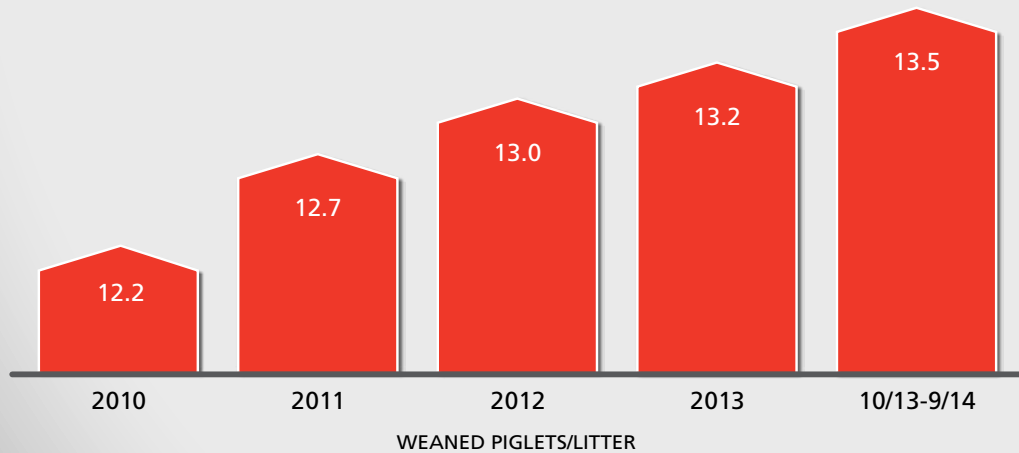

High Productivity With Feed Efficiency

More Piglets Per Sow Per Lifetime

U.S. Producer With a 10,400 Sow Farm Shows Continuous Improvements
